

# *MarJen for Error Quilt Supplies*

## *Hardware:*

Embroidery machine and accessories

Your machine needs to have a minimum hoop size of 225mm x 140mm. You will need your embroidery hoops, matching grids, bobbins, embroidery foot, walking foot, freehand quilting foot, clear or open-toe foot and 1/4" foot.

Computer software to transfer designs to your machine

Art Nouveau: Spring Flowers Embroidery CD by Jenny Haskins

vellum tracing paper - 2 sheets

You will need vellum paper to print embroidery templates from the cd.

template plastic - 2 sheets

You will need these to make a couple fan templates and a square block template.

titanium needles - 10-12 needles

You may use whatever kind of needle you prefer, but I would recommend titanium needles. They last longer and stay sharper for machine embroidery.

## *Threads:*

sewing thread - used for sewing the quilt pieces together

clear thread - used for quilting

embroidery bobbin thread

embroidery threads - 5 - 6 colors (You can start out with a spool for each color and add more as you need the colors.)

light green - 3 spools of 800-1,000 yds.

dark green - 3 spools of 800-1,000 yds.

light flower color - 3 spools of 800-1,000 yds.

medium flower color - 3 spools of 800-1,000 yds.

dark flower color - 3 spools of 800-1,000 yds.

## *Fabrics:*

fabrics - see Fabric Explanation sheet

batting - 120" wide - Queen - 3 yds. / King - 3 1/4 yds.

I prefer to use a wide batting so it doesn't need to be pieced. My personal choice of batting is a cotton/poly, but you may use whatever you prefer.

wonderunder - 7 yds.

I prefer to use Heat'n'Bond wonderunder. I have found this brand to be the best when fusing fabrics, but you may use whatever you prefer.

*Misc:*

tearaway stabilizer - approx. 100 sheets

505 spray adhesive - 2 large (17oz.) cans

Marti Michelle Dresden Plate template set

MarJen for Error magazine

Applique pressing sheet

This is helpful to have when fusing the fan and dresden plate pieces. The extra wonderunder will fuse to this and then peel off instead of fusing to your ironing board.

18mm rotary cutter

You need a small rotary cutter to cut around the fan and dresden plate templates.

water soluble blue marking pen

I prefer to use Collins water soluble blue marker. It marks a bright blue line that erases easily.

blue painter's tape

This is used to tape the embroidery templates and the hoop grid to the fabric.

spray starch

You will need this to starch the blocks and strips before stitching embroidery designs.

basic sewing tools

rotary cutter, mat, ruler

seam ripper, scissors, seam gauge, thread snippers, tape measure
