

MarJen for Error Quilt Fan Shape

This is the approximate size of the fan shape that you will be cutting out of the fabric to make the fan corners and dresden plates. Cut this out and take it with you when you are fabric shopping. Put it up against the fabric, looking to see if the flowers will fit nicely into the shape. Remember that the flowers will be cut in this shape for fussy cutting.

You could also trace this onto template plastic, vellum paper or transparency paper so you can see through it to the fabric to see where the fussy cut flowers would be placed.
